OSHA Cranes & Derrick Review
Subpart CC

John Frowd
Compliance Assistance Specialist
United States Dept. of Labor-OSHA
Manhattan Area Office
(212)337-2008
Frowd.john@dol.gov

CSHO In-Service
Learning Objectives

• Review highlights of the new crane and derricks standard
• Identify crane operator qualification and certification requirements
• Identify types and frequency of inspections for overhead cranes
• Identify supplemental requirements for tower cranes
Topics to be Covered

- New Standard
- Scope
- Ground Conditions
- Assembly/Disassembly
- Power Line Safety
- Inspections
- Rigging
- Signals
- Operator Qualification/Certification
- Tower Cranes (supplemental requirements)
Cranes and Derricks

Effective Date - November 8, 2010
Important Dates

• Released – July 28, 2010
• Published – August 9, 2010
• Effective – November 8, 2010
  – Qualification of riggers
• Phased in over four years – August 9, 2014
  – Certification of operators phased in over four years (except for State and local licensing)
Highlights

- **Scope**
- **Definitions**
- **Ground Conditions**
- **Assembly/Disassembly**
- **Power Line Safety**
- **Inspections**
- **Wire Rope**
- **Safety Devices**
- **Operational Aids**
- **Operation**
- **Authority To Stop**
- **Signals**
- **Fall Protection**
- **Work Area Control**
- **Keeping Clear Of The Load**
- **Free Fall/ Controlled Load Lowering**
- **Operator Qualification and Certification**

- **Signal Person Qualifications**
  - Qualifications of Maintenance and Repair Workers
    - Training
    - Hoisting Personnel
    - Multiple Crane/Derrick Lifts
  - Design, Construction and Testing
    - Equipment Modification
      - **Tower Cranes**
        - Derricks
  - Floating Cranes & Land Cranes on Barges
    - Overhead and Gantry Cranes
      - Dedicated Pile Drivers
      - Sideboom Cranes
  - Requirements for Equipment w/ Capacity of 2000 lbs and Less
Subpart CC is Substantial

- 1075 pages (with preamble)
- 275,633 words
- 1,517,395 characters
- 14,478 paragraphs
- 36,405 lines
What is Covered?

• Functional Description
  – Can hoist
  – Lower
  – Horizontally move a suspended load

• Long List of Examples
Examples

Articulating cranes (such as knuckle-boom cranes)
Crawler cranes
Floating cranes
Cranes on barges
Locomotive cranes
Mobile cranes (such as wheel-mounted, rough-terrain, all-terrain, commercial truck-mounted, and boom truck cranes)
Multi-purpose machines when configured to hoist and lower (by means of a winch or hook) and horizontally move a suspended load

Industrial cranes (such as carry-deck cranes); dedicated pile drivers; service/mechanic trucks with a hoisting device
Crane on a monorail
Tower cranes (such as fixed jib, “hammerhead boom”, luffing boom and self-erecting)
Pedestal cranes
Portal cranes
Overhead and gantry cranes
Straddle cranes
Side-boom tractors
Derricks

…and Variations of Such Equipment
Scope

Specific Exclusions
- Backhoes and forklifts

Limited Requirements for:
- Capacity: 2000 pounds or less
- Dedicated pile drivers
- Overhead and gantry cranes
- Side-boom tractors

Supplemental Requirements for:
- Tower cranes
- Derricks
- Floating cranes & land cranes on barges
Ground Conditions
Ground Conditions (cont’d)

- Controlling Entity:
  - Provide adequate conditions
  - Firm, drained and graded
- Sufficient to Support Crane (in conjunction with blocking, mats, etc.)
Ground Conditions (cont’d)

- Inform User and Equipment Operator of Known Underground Hazards (voids, utilities, etc.)
Assembly/Disassembly
• Two Options:
  – Manufacturer procedures *or*
  – Employer procedures (criteria requirements)
• Assembly/Disassembly Supervisor
  – Must be a competent and qualified person
• Assembly/Disassembly Supervisor Must Understand Procedures and:
  – Review procedures (unless they’ve used them before)
  – Check that crew members understand their tasks and hazards
  – Follow manufacturer’s prohibitions
  – All rigging work is by a Qualified Rigger
  – When using outriggers, fully extended or deployed per the load chart
• Assembly/Disassembly Supervisor Addresses 12 Key Hazards, Including:
  – Adequate site and ground conditions
  – Sufficient blocking for load and stability
  – Suitable boom and jib pick points
  – Identify center of gravity
  – Stability for pin removal
  – Consider wind speed and weather
Assembly/Disassembly (cont’d)

• 12 Key Hazards (*continued*):
  – The suitability of blocking material
  – Verification of the loads for assist cranes
  – Snagging of cables or components
  – Struck by counterweights
  – Boom hoist brake failure
  – Loss of backwards stability
Power Lines (cont’d)

• Step 1: Identify Work Zone
  – Work Zone = marking boundaries OR
  – 360 degrees around crane, up to maximum working radius
Could you get within 20 feet of a power line?

YES

Option #1
Deenergize & Ground

Option #2
20-foot Clearance

Option #3
Ask Utility for Voltage and Use Table A (with minimum clearance distance)

NO

Encroachment Prevention

• Planning Meeting
• If Tag Lines are Used, They Must be Nonconductive
• Elevated Warning Lines, Barricades, or Line of Signs

PLUS (Choose One):

• Proximity Alarm, Spotter, Warning Device, Range Limiter, or Insulating Link

No Further Action
<table>
<thead>
<tr>
<th>Voltage (nominal, kV, alternating current)</th>
<th>Minimum Clearance Distance (feet)</th>
</tr>
</thead>
<tbody>
<tr>
<td>up to 50</td>
<td>10</td>
</tr>
<tr>
<td>over 50 to 200</td>
<td>15</td>
</tr>
<tr>
<td>over 200 to 350</td>
<td>20</td>

<tr>
<td>over 350 to 500</td>
<td>25</td>
</tr>
<tr>
<td>over 500 to 750</td>
<td>35</td>
</tr>
<tr>
<td>over 750 to 1000</td>
<td>45</td>
</tr>
<tr>
<td>over 1000</td>
<td>(as established by the power line owner/operator or registered professional engineer who is a qualified person with respect to electrical power transmission and distribution)</td>
</tr>
</tbody>
</table>
**Must Show:**
- Staying Outside Zone is Infeasible
- Infeasible to Deenergize and Ground

**All of the following are required:**

1. Power Line Owner – **Sets Minimum Approach Distance**
2. Planning Meeting – Procedures
3. Dedicated Spotter
4. Elevated Warning Line or Barricade
5. Insulating Link/Device
6. Nonconductive Rigging
7. Range Limiter (if Equipped)
8. Nonconductive Tag Line (if used)
9. Barricades - 10 feet from Equipment
10. Limit Access to Essential Employees
11. Ground Crane
12. Deactivate Automatic Re-energizer
Operator Qualification/Certification
Operator Qualification and Certification - 4 Options

- **OPTION 1:** Accredited Testing Organization
- **OPTION 2:** Employer Qualification Program
- **OPTION 3:** U.S. Military
- **OPTION 4:** State/Local Government License
Option 1: Accredited Testing Organization

Nationally Recognized Accrediting Agency

Determines Compliance with Testing and Test Administration Criteria

Accredited Testing Organization

Develops and Administers the Tests (Written and Practical) to Certify Operators

Different Tests for Different Capacity/Type of Equipment
Option 2: Employer Qualification Program

Accredited Testing Organization

Auditor

Certifies

Employer Qualification Program

Compliance with Testing & Test Administration Criteria

Employer-administered Written & Practical Tests
Option 3: U.S. Military

U.S. Military

Issues Operator Qualification
Option 4: State/Local Government License

State/Local Government Authority that Oversees Licensing Office

Determines License Office Complies with Testing/Test Administration Criteria

State/Local Government License Office

Issues Operator License
### Operator Qualification and Certification (cont’d)

<table>
<thead>
<tr>

<td>NO *</td>
<td>Set by issuing entity</td>
</tr>
<tr>
<td><strong>State/Local License</strong></td>
<td>NO *</td>
<td>Set by issuing entity, not &gt; 5 years</td>
</tr>
<tr>
<td></td>
<td>Valid only in entity’s jurisdiction</td>
<td>Set by issuing entity, not &gt; 5 years</td>
</tr>
</tbody>
</table>

* Subject to State & Local requirements and whether or not the military/state training meets accredited requirements.
Operator Qualification and Certification (cont’d)

• **OPTION 1:** Accredited Testing Organization
• **OPTION 2:** Employer Qualification Program
• **OPTION 3:** U.S. Military
• **OPTION 4:** State/Local Gov License

---

**Testing Criteria**

- **Knowledge (Written Test):**
  - Controls/performance characteristics
  - Calculate capacity (with or without calculator)
  - Preventing power line contact
  - Ground support
  - Read and locate info in operating manual
  - Appendix C subjects

- **Practical Test**
Signaling
Signals

• Signal Person - When Required:
  – Point of operation not in full view of operator
  – View of direction of travel is obstructed
  – Site specific safety concerns

• Signal Types:
  – Hand, voice, audible or “new”
  – Only time an operator can use a cell phone while lifting
### Signal Person Qualifications

<table>
<thead>
<tr>
<th>Qualified How</th>
<th>Documentation</th>
<th>Portable</th>
</tr>
</thead>
<tbody>
<tr>
<td>3rd Party Qualified Evaluator</td>
<td>Yes</td>
<td>Yes</td>
</tr>
<tr>
<td>Employer Qualified Evaluator</td>
<td>Yes</td>
<td>No</td>
</tr>
</tbody>
</table>
• **Qualification Requirements:**
  
  – Know and understand signals
  – Competent in using signals
  – Basic understanding of crane operation
  – Verbal or written test and practical test
<table>
<thead>
<tr>
<th>Type of Inspection</th>
<th>Who Inspects</th>
</tr>
</thead>
<tbody>
<tr>
<td>Modified or Repaired/Adjusted</td>
<td>Qualified</td>
</tr>
<tr>
<td>Post-assembly</td>
<td>Qualified</td>
</tr>
<tr>
<td>Shift</td>
<td>Competent</td>
</tr>
<tr>
<td>Monthly</td>
<td>Competent</td>
</tr>
<tr>
<td>Annual</td>
<td>Qualified</td>
</tr>
</tbody>
</table>
Inspections (cont’d)

- **Shift** = Visual Inspection for Apparent Deficiencies

- **Monthly** = Documented Shift Inspection

- **Annual** = Comprehensive, Every 12 Months
Operations

- All loads that are to be received must be rigged by a qualified rigger.
- Employer developed operations procedures, load charts, etc., MUST be in the cab of the crane and signed by RPE if manufacturer’s manual is not available.
- Distracted operator clause = no cell phone unless used for signaling.
- New load weight criteria.
Fall Protection

• Part CC has its Own Fall Protection Requirements

• Training Requirement Ties Back to Subpart M

• Subpart M Reference to Anchor Points
Wire Rope Inspections

- Daily – No Documentation
- Monthly – Documented
- Annual – Documented
- Category I, II or III Deficiencies
Safety Devices

• Safety Devices = Required + *Operational At All Times*

• Include:
  – Crane Level Indicator
  – Boom/Jib Stops (except Derricks)
  – Integral Holding Device/Check Valve for Outrigger Jacks
Operational Aids

- Operational Aids are Required but Temporary Alternative Measures are Allowed while Being Repaired

- Temporary Alternatives
  - Boom hoist limiting device, if not working:
    - Boom angle indicator or
    - Mark the boom hoist cable
• Replacement of Parts:
  – Category I
    • Repaired within 7 days
  – Category II
    • Repaired within 30 days

*Exception: unless employer has documented it ordered parts then repaired within 7 calendar days of receipt*

  – Category III
Tower Cranes
SUPPLEMENTAL REQUIREMENTS
Highlights of Supplemental Tower Crane Requirements

Foundations & Structural Supports
- Design & inspection

Plumb Tolerance
- Specification & verification

Climbing Procedures
- Host structure strength verification
- Wind

Post-erection Load Test

Monthly Inspection: Tower mast bolts, upper-most tie-in, braces, floor supports, floor wedges
Required Documentation

- Monthly and Annual Inspection Reports for:
  - Cranes
  - Wire rope
  - Signal person training
  - Tower crane foundation/support design
Summary

- **Ground Conditions**
- **Assembly/Disassembly**
- **Power Line Safety**
- **Inspections**
- **Rigging**
- **Signaling**
- **Operator Qualification/Certification**
- **Tower Cranes (Supplemental Requirements)**
